EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin Smith on March 27, 2006.

2. The application has been amended as follows:

1. (Amended) A communication receiver that is operable to receive a signal that is transmitted via communication channel, the received signal comprising a training sequence portion and a data portion, the communication receiver comprising:

a channel estimation block that is operable to estimate a characteristic of a communication channel; and

a channel equalizer block that is operable to calculate a plurality of channel equalizer tap coefficients, the plurality of channel equalizer tap coefficients being used to equalize for any communication channel-induced changes within the received signal; and

wherein ~~at least one of~~ the channel estimation block and the channel equalizer block performs repeated adaptation;

Art Unit: 2611

the channel estimation block being operable to employ repeated adaptation on the training sequence portion and the data portion, the repeated adaptation of the channel estimation block being performed using a plurality of channel estimation cycles; and

the channel equalizer block being operable to employ repeated adaptation on the training sequence and the data portion, wherein the channel equalizer block calculates the plurality of equalizer tap coefficients by performing repeated adaptation on the training sequence portion and the data portion using the plurality of channel equalizer cycles; and

wherein the plurality of channel estimation cycles includes a plurality of regions; and wherein the channel estimation block performs region-dependent error handling using repeated adaptation on the training sequence portion and the data portion.

Claim 9 has been cancelled.

Claim 10, line 1, "9" has been changed to --1--.

3. The following is an examiner's statement of reasons for allowance:

The limitation of a plurality of channel estimation cycles includes a plurality of regions; and wherein the channel estimation block performs region-dependent error handling using repeated adaptation on a training sequence portion and a data portion

found in original independent claims 1, 17, 34, 45, and 60 is not found in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
